

PREVENTIVE MAINTENANCE CHECKLIST

Make uptime *all the time*

DAILY MAINTENANCE

-  Monitor fluid levels
-  Check air filter condition
-  Grease pivot pins
-  Check tire air pressure, or inspect and adjust track tension

WEEKLY MAINTENANCE

-  Check battery cables, connections and electrolyte levels
-  Examine hydraulic hoses and tube lines
-  Check the condition of belts
-  Test parking brake, wheel nuts, foot pedals, hand controls and steering levers/joysticks
-  Check final drive transmission oil levels (chaincase/motors)
-  Grease swing circle and pinion (mini excavators)

AS SCHEDULED PER MAINTENANCE MANUAL

-  Replace fuel filter, engine oil and filter
-  Clean reservoir and reservoir breather
-  Replace hydraulic oil and case drain filters
-  Replace the lubricant in chaincase/final drive motors
-  Adjust the engine valve clearance
-  Drain and flush cooling system and replace coolant
